

GAMS

IS THE PERFECT TOOL FOR MODELERS ACROSS INDUSTRIES

If you are not already using GAMS for your optimization, here are some reasons to start right now:

Cutting Edge Modeling

- Build your models in a language similar to their mathematical description
- The GAMS language is powerful, yet easy to learn
- We offer responsive technical support by highly competent experts

Design Principles that make a Difference

- Switch between platforms, solvers, data sources
- Integrate GAMS seamlessly into your application with our APIs
- Protect your investment with our unconditional commitment to backward compatibility

Innovation through Research

- We invest in the future by developing innovative modeling concepts
- GAMS has a large user base in more than 120 countries
- Maturity through more than 30 years of experience
